

The faced chipboard panels supplied to customers from the Gruppo Trombini S.p.A. factories are classified as follows:

1. Faced chipboard panels – 1st grade

Panels without mechanical or physical defects which could impede normal use or, at most, only one imperfection visible to the naked eye in various light effects at a distance of 1 metre or with an open border no more than 1cm or with a small fault near the edge.

2. Faced chipboard panels – 2nd grade

Panels with imperfections detectable from more than 1 metre in only one part of the panel and which does not alter the use of more than 5% of the surface. Defects such as streaks, bevelling, printing flaws and non conformity to the physical and mechanical properties of the raw panel are not acceptable.

Unless otherwise agreed with the customer the Gruppo Trombini S.p.A. will supply a quantity of up to 5% 2nd grade faced chipboard panels every three months.

Unless specifically requested by the customer we do not send consignments of second grade material only.
